

# IT FOR SCHOOLS OUR SERVICES IN A NUTSHELL

To make the right decision, you need the right information. And we provide this to you. We want you to have the necessary knowledge-advantage in order to make the most of opportunities and keep you ahead of your competition.

**Management -**  
we work with your team to ensure that your software is user-friendly and effective, whilst also monitoring and managing hardware with regular visits from our team.

**Customised training and ongoing mentorship -**  
we develop training material and deliver training to our staff and yours to ensure that you get the best value.

**Consulting and project management -**  
open communication between our team and yours that will improve efficiency when planning or rolling out a new project. We create a custom budget, financial plan and strategic plan to suit your needs.

**App & Software Development -**  
save money and create a more responsive approach with custom apps to streamline processes and enable school transformation.

**Hardware and software -**  
cost-effective state-of-the-art hardware supply and software installation, maintenance and support.

**Levels of support -**

**Full Package-**  
supply tech that is managed, trained and supported by management team.

**Management Package-**  
manage, train and support your tech.

**Adhoc-**  
one-off IT management and IT support for individual projects.

**Management of school-owned hardware and software -**  
optimising, managing, and maintaining you currently existing IT infrastructure.

**24/7 onsite and offsite IT support -**  
onsite and remote support, proactive IT support, risk assessment.

let's  
GROW  
TOGETHER
